Remove Vm From Parallels Desktop For Mac

Right-click on the virtual machine and select “Clone” from the popup menu You can also press Ctrl+O.. To do this, open VirtualBox (on Windows, Linux, or Mac) and select the virtual machine to be cloned.. The Clone Virtual Machine dialog box displays. It’s not hard to install, and it acts pretty much like any other application on.. First, we’ll create a clone of the virtual machine you want to convert to Parallels.. Parallels Desktop (PD) for Mac is now at version 13 It costs \$80 per year, and there’s student pricing at \$40.
